Eds.Change - Reach Your Full Ability

I can ask measure out specific ingredients before I start cooking.

Newsletter

Welcome!

To this weeks addition of the newsletter and what a week it was! We missed Luke and David as both were away sick but we decided to crack on with the fun. As it was school holidays we were able to use the fully equiped school kitchen which meant we could branch out and use both ovens. As we had so much space we decided to make individual chicken pies accompanied by mash potato.

Before we began our cooking we headed out to Allambie heights and did some shopping at the IGA. Everyone in the group is now very familiar with the layout and we are working towards independently finding the ingredients on our lists. Michael even found some sneaky brownie mix which he convinced Katie we needed for dessert

This week we continued to focus on measuring as a key skill. Everyone is now semi-independently using measuring tools. We laid out all our ingredients prior to starting and measured the quantities we needed. We paid particular attention to measuring liquids out using measuring jugs.

Once we had measured all the ingredients we began chopping up the harder food. All the team are getting use to this process and our knife skills are developing.

Don't forget to check out our antics on our new instagram account for Eds. Change (@eds.change) Katie regularly posts videos and pictures up there.

Next week we are looking forward to cooking home made pizza's as we once again have the big oven in the school's kitchen.

Best,
The Eds. Change Team.
